Management Discussion of Fund Performance

Investment Objectives and Strategies

The Fund invests in a diversified portfolio of emerging technology companies with the objective of providing long-term capital appreciation to investors.

The Fund is closed to new investors. The Fund is focused on making new investments and working with existing portfolio companies to enhance shareholder value. The companies in which the Fund invests must be eligible businesses in accordance with the B.C. Small Business Venture Capital Act (SBVCA). In general, this means companies based in B.C. that have less than 100 employees and carry on a business activity as specified in the SBVCA.

The Fund's strategy for achieving its objective is to invest in early stage software, hardware and industrial technology companies. The Fund invests in companies with superior technology, large market opportunities and experienced management. Portfolio companies include private and public companies, as well as companies from the start-up stage through to revenue. Where appropriate, the Fund seeks to build and mentor management in emerging companies to enhance shareholder value.

Risk

An investment in the Fund is highly speculative and carries significant risk. An investment in the Fund is a long-term investment. Over the fiscal year, no material or significant changes occurred that affected the overall risk level associated with the Fund.

The risks of investing in the Fund include a relatively large proportion of private company investments and a concentration in early-stage and technology companies. A significant portion of the Fund's investments are in private companies, for which no ready market exists. Valuation of private companies for which no published market exists is subject to inherent uncertainties, and the resulting values may differ from values that would have been used had a ready market existed for the investments.

The Fund is subject to the rules and restrictions of the SBVCA. If the Fund contravenes the SBVCA and has to repay tax credits, it may impair the Fund's ability to carry on business and meet its investment objectives.

There is no market for the Fund's shares, and no market is expected to develop. Investors will not, typically, be able to dispose of their investment other than by way of redemption. In accordance with the SBVCA, investments in portfolio companies must be held for at least five years. As such, an investor's redemption of the Fund's shares is prohibited for at least five years from the date the Fund invests in eligible companies in accordance with the SBVCA. Practically speaking, investors will not be able to redeem their investment for six to seven years from the date they invested.

Results of Operations

Investment Activity

During the fiscal year, the Fund completed investments of \$0.95 million in 4 new and existing venture investments and disposed of 3 investments with a cost of \$1.23 million, for which the Fund received proceeds of \$3.05 million and a net gain of \$1.83 million. The fair value of the Fund's portfolio investments as at December 31, 2007 represented 51% of the net assets of the Fund, while cash and other net assets represented 49% of net assets.

The following table summarizes changes in the composition of the Fund's investment portfolio in comparison to the prior fiscal year:

	2007	2006
Venture Investments, Cost	\$ 2,350,265	\$ 2,625,050
Venture Investments, Fair Value	2,821,551	3,914,848
Number of Venture Investments:		
Private	11	9
Public	9	7
	2	2

Of the fair value of the Fund's investments, \$0.80 million or 28% are public companies and \$2.02 million or 72% are private companies. Of the number of the Fund's investments, 82% are private companies and 18% are public companies.

Investment Performance

Over the past year, the Fund's net asset value per share (NAVPS) increased by 65 cents. The increase in NAVPS was principally due to the realized gains on the sale of venture investments, which was partially offset by operating costs incurred by the Fund in excess of investment income and contingent equity participation recovery (see section entitled "Financial Highlights").

The Advantage Technology Fund's management expense ratio (MER) was 4.90% for fiscal 2007 (2006 - 5.57%) before equity participation amounts and 8.93% (2006 - 11.82%) including equity participation paid during fiscal 2007 and the change in contingent equity participation accruing on unrealized gains for fiscal 2007. Management expense ratio is based on the total expenses incurred by the Fund inclusive of management fees and all operating costs.

Over the fiscal year, the Advantage Technology Fund outperformed the Globefund Retail Venture Capital Index (see section entitled "Past Performance").

Recent Developments

The Fund is managed by Lions Capital Corp. (the Fund Manager). Consistent with prior periods, the Fund invests in a diversified portfolio of emerging technology companies with the objective of providing long-term capital appreciation to investors. The Fund Manager has maintained the Fund's strategy of investing early in companies with superior technology, large market opportunities and experienced management.

Recent Developments (continued)

The Canadian Institute of Chartered Accountants has issued Handbook Section 3855, *Financial Instruments - Recognition and Measurement* (S3855) which applies to fiscal years beginning on or after October 1, 2006. The adoption of S3855 impacts the calculation of the net asset value of the Fund for financial reporting purposes because it requires publicly-traded investments to be valued using bid prices rather than the last sale price as was the prior accounting policy of the Fund. As a result of the adoption of this policy, the Fund recorded a transitional adjustment arising from the use of bid prices to value opening net assets on January 1, 2007, as disclosed in the Fund's Statement of Changes in Net Assets.

S3855 also requires that transaction costs, such as brokerage commissions, incurred in the purchase and sale of securities by the Fund, be charged to income from operations in the period incurred. There is no impact to net assets or results of operations of the Fund as a result of this change in accounting policy.

Related Party Transactions

In accordance with the management agreement between the Fund and the Fund Manager, the Fund Manager receives management fees equal to 2.75% of the net asset value of the Fund, calculated and paid monthly. Also in accordance with the management agreement, separate from the management fee, the Fund reimburses the Fund Manager for expenses incurred by the Fund Manager in connection with its obligations pursuant to the management agreement. The Fund Manager may also earn an equity participation amount based on the realized gains and cumulative performance of the Fund. Equity participation amounts of \$110,207 (2006 - \$322,960) were accrued by the Fund, payment of which is contingent upon realization of related gains and continued achievement of the Fund's performance criteria as disclosed in the Fund's financial statements for the year ended December 31, 2007.

Related party transactions are disclosed in note 8 of the Fund's audited financial statements for the years ended December 31, 2007 and 2006.
